Summary

This licensing brief addresses the commonly asked questions about licensing Microsoft Office suites in Microsoft Volume Licensing programs.

This brief only addresses questions about use rights for Microsoft Office for the Windows operating system acquired as a software product under a desktop application license (typically, a perpetual license). For more information about use rights for Microsoft Office acquired as a subscription service as part of Microsoft Office Professional Plus for Office 365, see the "Licensing Microsoft Office Professional Plus for Office 365" brief. To learn more about licensing Microsoft Office for Mac, see the "Licensing Windows and Microsoft Office to Use with the Apple Mac" brief.

What's New in This Brief

This brief replaces a previous version published in June 2011. It has been updated to reflect the latest release of Microsoft Office.

Licensing Microsoft Office software in Volume Licensing

Details

Per Device Microsoft Office Licensing

Microsoft Office as a software offering under the desktop applications licensing model is licensed on a “per-device” basis. Users must assign each Microsoft Office license to a single physical hardware system (“licensed device”). The license permits use of the software on the licensed device.

Volume Licensing customers have the right to install and use any number of copies of the software on the licensed device on physical and/or virtual machines.

Customers may access Microsoft Office remotely, but one license is required for each physical device running or accessing the application. This includes situations where you run the software on your local device or access the software installed on another device like a server. See more detail in the Remote Access for Microsoft Office section.

Remote Access for Microsoft Office

With Remote Use Rights, a company may install Microsoft Office on a single device such as a server and then allow users to access Microsoft Office remotely from licensed desktops (or as the primary user of the licensed device hosting the session) as if the desktop application was installed locally on their desktops. Remote Use Rights are granted under desktop application licenses for Microsoft Office acquired through Microsoft Volume Licensing.

When a copy of Microsoft Office software is installed on a server, users may remotely access and use the copy of Microsoft Office from any licensed device. When a copy of Microsoft Office is installed on a desktop, the primary user of the desktop may remotely access and use the software from any other device. Other users in the organization may also access and use the copy of software installed on a desktop from other separately licensed devices.

Examples of remote access technology used with Microsoft Office licensed as a desktop application include Remote Desktop Services (RDS) as part of Microsoft Virtual Desktop Infrastructure (VDI) solution. Using any component of this technology requires an RDS CAL license for each user or device used to access the server remotely.

Components of a Microsoft Office suite may vary per software product edition. Under Remote Use Rights, a customer may only access a copy of the same edition of Microsoft Office as its copy on their individual licensed device. For example, if a customer is using a device licensed for Microsoft Office Standard 2013, they may access Office Standard 2013 running on a server. The device may not use Remote Use Rights to use components of Office Professional Plus 2013.

Licensing Office Web Apps

With the latest Microsoft Office, everyone has view-only access to Office Web Apps documents. For editing of Office Web Apps documents, you need an Office suite license acquired through Volume Licensing. These use rights are not licensed as part of Software Assurance. The single primary user* of an Office licensed device can edit the Office Web Apps from any device, including those not licensed for Office. External users** do not need an Office suite license to view or edit Office Web Apps documents.

*The primary user is the user who uses the licensed device more than 50 percent of the time in any 90 day period.

**External users are those users that are not either your or your affiliates’ employees or your or your affiliates’ on-site contractors or on-site agents.

Licensing Microsoft Office Home & Student 2013 RT for Commercial Use

Microsoft Office provides the best Office experience across devices. The Windows RT operating system and Surface software and touch computing platform tablets come preinstalled with Office Home & Student 2013 RT software on the device for noncommercial use.

If you are the primary user of a device licensed with Office Professional Plus 2013 or Office Standard 2013, then you can use Office Home & Student 2013 RT for commercial use. The primary user of a device licensed for Office for Mac

Licensing Microsoft Office software in Volume Licensing

Standard 2011 also has Commercial Use Rights for Office Home & Student 2013 RT. You do not need active Software Assurance for Office to receive this benefit. You can also purchase perpetual licenses for Commercial Use Rights for Office Home & Student 2013 RT on a per-device basis through the Microsoft Open License or Microsoft Select Plus programs. If you use a Windows RT or Surface tablet to access Office Professional Plus 2013 or Office Standard 2013 software running remotely in a data center, the Windows RT or Surface device must be separately licensed for the corresponding Office suite.

Licensing Office for Use with Windows To Go

You can use Office installed on a USB drive with Windows To Go when you license the work device for the following:

- ▶ Windows 8.1 with Software Assurance for the Windows desktop operating system or Windows Virtual Desktop Access subscription license; and
- ▶ Office Professional Plus 2013 or Office Standard 2013

As a result, a user can use a USB drive to run Office on any licensed work device while on company premises. If you also have active Software Assurance for your Office suite license, the primary user of the licensed device can use the USB drive to run Office on devices outside of the workplace through the Office Roaming Rights benefits.

Office Suites Available Through Volume Licensing

Office Standard 2013 and Office Professional Plus 2013 are available as software products under desktop application licenses through Microsoft Volume Licensing.

	Office Professional Plus 2013	Office Standard 2013
Microsoft Word	✓	✓
Microsoft Excel spreadsheet software	✓	✓
Microsoft PowerPoint presentation graphics program	✓	✓
Microsoft Outlook messaging and collaboration client	✓	✓
Microsoft OneNote note-taking program	✓	✓
Microsoft Publisher	✓	✓
Microsoft Office Web Apps	✓	✓
Commercial User Rights for Office Home and Student 2013 RT NEW!	✓	✓
Enterprise Server Integration Features	✓	
Microsoft InfoPath information-gathering program	✓	
Microsoft Lync Server communications software	✓	
Microsoft Access database software	✓	

Licensing Microsoft Office software in Volume Licensing

Acquiring Microsoft Office Licenses in Volume Licensing

Volume Licensing programs where different editions of Microsoft Office are available as a software product under desktop application licenses vary (as shown in the following table).

Volume Licensing program	Office Standard 2013	Office Professional Plus 2013
Open***	•	•
Open Value*	•	•
Open Value Subscription**	•	•
Select Plus***	•	•
School Enrollment		•
Enrollment for Education Solutions**		•
Enterprise Agreement**		•
Enterprise Subscription Agreement**		•

*Office Professional Plus may be licensed as an enterprise product.

**Office Professional Plus must be licensed as an enterprise product.

***Microsoft Office stand-alone applications are available for licensing (e.g. Microsoft Excel).

Microsoft Office Downgrade Rights

Some customers who have rights to more recent versions of Microsoft Office suites might want to continue using prior versions of those suites. This is permitted for Microsoft Office under desktop application licenses and is known as a "downgrade right." Customers may downgrade to earlier versions of the Microsoft Office software products, but only to the same edition of software product for which their device is licensed. That is, a customer may not downgrade from Office Standard 2013 to Office Professional Plus 2010.

The following shows the downgrade rights for the most recent Microsoft Office version:

Microsoft Office license	Downgrade rights
Office Standard 2013	Office Standard 2010
Office Professional Plus 2013	Office Professional Plus 2010

Software Assurance Benefits for Microsoft Office

The Microsoft Software Assurance benefits vary by product and product pool. The following are key Software Assurance benefits applicable to Microsoft Office acquired as a software product under desktop application licenses.

New Version Rights

With Software Assurance, customers are eligible to upgrade to new versions of licensed software. New Version Rights means the right to upgrade to the latest version of that software product that we make available during the Software Assurance covered period. Customers may run the new version of software in place of the licensed product. For example, if a new version of Microsoft Office is made available during the term of your coverage, your licenses will automatically be upgraded to the new version (for example, from Office Standard 2010 to Office Standard 2013 or from Office Professional Plus 2010 to Office Professional Plus 2013).

Customers who acquired perpetual licenses through Software Assurance can deploy the upgrades after their coverage has expired. This is the case in Open, Open Value, Select Plus, and Enterprise agreements, but not applicable to Microsoft subscription programs, like Open Value Subscription and Enterprise Subscription agreements. When the

Licensing Microsoft Office software in Volume Licensing

subscription expires, so do the rights to use Microsoft Office software products and to upgrade to the new version of the software product.

Roaming Use Rights

Customers with active Software Assurance for Microsoft Office software products are eligible to use roaming rights benefits. The single primary user of the licensed device may remotely access the software running on servers (e.g. in your data center) from a qualifying third-party device or run the software in a virtual Operating System Environment (OSE) on a qualifying third-party device. Additionally, if the device is also licensed for Software Assurance for the Windows desktop operating system, you may run Office from a USB device with Windows To Go.

A qualifying third-party device is a device that is not controlled, directly or indirectly, by you or your affiliates (e.g., a third party's public kiosk). When the primary user is on your or your affiliates' premises, Roaming Use Rights are not applicable. For example, an employee may not use their personal devices on premises and exercise their roaming rights benefits. This same user may access Microsoft Office from this personal device when at home.

Home Use Program

Under the Home Use Program, customers' employees may acquire a single Microsoft Office license for software to be installed on one home computer. The Home Use Program license needs to be the corresponding Microsoft Office software product licensed on the work device. In addition, the license terms for that software permit the primary user of the home computer to install and use another copy on a portable device.

Customers' eligibility to participate in the Home Use Program ends with the expiration or termination of Software Assurance coverage on qualifying Microsoft Office license or termination of employment.

Microsoft Office Multi-Language Pack

The Microsoft Office Multi-Language Pack provides the flexibility to customize Microsoft Office for multilingual needs. Customers with active Software Assurance for Microsoft Office software products may deploy and use the latest version of the Office Multi-Language Pack on their licensed devices.

The rights to use this Software Assurance benefit may vary per region or agreement. If a customer is permitted under their license agreement to run only equal or lower priced single-language versions, their right to use the Office Multi-Language Pack is likewise subject to that limitation.

Customers that acquire perpetual licenses of Microsoft Office software products will also have, through Software Assurance, the perpetual right to use the Microsoft Office Multi-Language Pack with that software even after their coverage has expired. This is the case in Open, Open Value, Select Plus, and Enterprise Agreements, but not applicable to our subscription programs, like Open Value Subscription and Enterprise Subscription Agreements. When the Enterprise Subscription Agreement expires, the Microsoft Office license and the right to use Office Multi-Language Pack both expire.

Frequently Asked Questions

- 1. I have an employee from our Marketing organization that only needs to use Microsoft PowerPoint. Can an employee from our Finance organization that does not need PowerPoint share their Microsoft Office suite with the Marketing organization user?**

Office Standard and Office Professional Plus are Microsoft Office suites which consist of more than one software product offered under a single license. Users may not separate the software for use on more than one computer. If you have employees that only need to use a single Microsoft Office application, all of Microsoft Office application licenses are available for purchase on a stand-alone basis in Open and Select programs.

Licensing Microsoft Office software in Volume Licensing

2. Our company has a mixed deployment with both Office Standard 2013 and Office Professional Plus 2013. What Microsoft Office licenses do I need if my users access Microsoft Office remotely from a server?

Customers must license all devices accessing a server for the same Microsoft Office suite installed on their licensed devices. The organization may accomplish this by: 1) deploying a single Microsoft Office edition company-wide; 2) maintaining separate servers for each Microsoft Office edition.

3. Our company has a mixed deployment with both Office Professional Plus 2013 in German language and English language. What Microsoft Office licenses do I need if my users access Microsoft Office remotely from a server?

Microsoft Office licenses are for a single language. Users may choose to deploy any single language wherever Microsoft Office software products are localized. However, users must license all devices accessing a server for the same Microsoft Office software product of their licensed devices. The organization may accomplish this by: 1) deploying Office Multi-Language Pack company-wide; 2) maintaining separate servers for each Microsoft Office language.

4. I have a personal laptop device I like using at work for meetings. May I access a Microsoft Office copy remotely that is deployed on a company server using Remote Desktop Services?

Depending on your company's policies, you might be allowed to access Office through your personal device if you or your device is licensed properly for RDS CAL and the Office running on company server is licensed properly too. However, Office Roaming rights wouldn't be applicable here. Users may not benefit from Office Roaming Rights when accessing Microsoft Office within a corporate network. Only third-party qualified desktops used outside of company premises may exercise Office Roaming Rights. Some examples include home and airport kiosk devices.

5. How can I be licensed for access to the Office Web Apps?

The Office Web Apps are included when you purchase Office Professional Plus 2013 or Office Standard 2013 licenses and allow you to view and edit Office files using the Office Web Apps Server.

6. Are the Office Web Apps included with the Office license or as part of Software Assurance?

The Office Web Apps are included with the Office Standard 2013 and Office Professional Plus 2013 licenses. They are not included as part of Software Assurance.

7. When licensed with Office Professional Plus 2013 or Office Standard 2013, are Office Web Apps licensed on a per-device or per-user basis?

Office client suites are licensed per device. The primary user of a device licensed for this Office software is licensed for access to the online companion Office Web Apps from any device. In these situations, the primary user is enabled for remote online access through Office Web Apps.

8. What licenses are required for external users collaborating with licensed employees?

External users accessing Office Web Apps documents for viewing or editing are not required to license the new Office suites. External users are those users who are not either your or your affiliates' employees or your or your affiliates' on-site contractors or on-site agents.

9. Do my employees need an Office Professional Plus 2013 or Office Standard 2013 license for viewing only Office Web Apps documents?

No. This new release of Office suite licenses are only required for those employees editing Office Web Apps documents.

10. What is included in the Office Web Apps that are licensed as part of Office licenses?

The Office Web Apps licensed with Office Professional Plus 2013 and Office Standard 2013 include Word Web App, Excel Web App, PowerPoint Web App, and OneNote Web App.

Licensing Microsoft Office software in Volume Licensing

11. Can I install a copy of Office Professional Plus 2013 or Office Standard 2013 on a USB drive with my Windows To Go rights?

Yes. You can install a copy of Office Professional Plus 2013 or Office Standard 2013 on a USB drive and use Office on any licensed work device. Those rights only apply for using a copy of Office on a USB drive on company premises. Note that you must have active Software Assurance for Windows to be licensed for Windows To Go rights.

12. Can I use a copy of Office Professional Plus 2013 or Office Standard on a USB drive outside of the workplace?

You can use a USB drive with Office Professional Plus 2013 or Office Standard 2013 outside of the workplace only if you have active Software Assurance with your Office suite license.

13. How can I license Office Home & Student 2013 RT for use on my tablet at work?

Commercial Use Rights for Office Home & Student 2013 RT are included with your Office Professional Plus 2013 or Office Standard 2013 license for the primary user of the licensed device. The primary user of a device licensed for Office for Mac Standard 2011 also has Commercial Use Rights for Office Home & Student 2013 RT. You do not need active Software Assurance for Office to receive this benefit. You can also purchase a perpetual per-device license for Commercial Use Rights for Office Home & Student 2013 RT on a stand-alone basis through an Open or Select Plus Volume Licensing Agreement.

14. What licenses are required to access Office Professional Plus 2013 or Office Standard 2013 remotely from my Windows RT or Surface tablet?

Office Professional Plus 2013 and Office Standard 2013 are licensed on a per-device basis. Users can only remotely access a copy of Office Professional Plus 2013 or Office Standard 2013 running on a network server from a licensed device. Therefore, your Windows RT or Surface tablet would need the latest Office suite license assigned to the device for this use.
